

Forestry product range

Safety for tires and loads

Dear customer,

with this brochure, pewag presents itself as an all-in-one provider in the forestry sector.

High standards have always been our strength, both in the manufacturing process and in the selection of raw materials. To ensure the outstanding quality of our range, all our production facilities are still based in Central Europe, allowing us to keep an overview of the entire manufacturing process and to offer forestry tracks, traction and choker chains as well as lashing chain systems that create innovative solutions while also living up to the highest quality standards.

pewag lashing chain systems

Individual lashing chains thanks to modular design.

When it comes to securing your forestry goods, safety is paramount for pewag. All our lashing chain systems are user-friendly and our lashing chains comply with all legal provisions regarding the securing of loads. Thanks to their modular design, they may be combined as required to fulfil your individual requirements.

On a global scale, pewag is a true pioneer when it comes to the production of lashing chains. Ease-of-use and compliance with all legal stipulations for the securing of loads are par for the course and the responsible foundation out of which all our products grow. These features are clearly measurable and are applied in product development as well as production. Quite simply, only the best products get manufactured!

Overview of the benefits of G12 lashing capacities:

- 50 % higher lashing capacity compared to G 8
- 20 % higher lashing capacity compared to G 10

Chains-ø	Lashing capacity G12	Lashing capacity G10	Lashing capacity G8
			
[mm]	[kN]	[kN]	[kN]
8	60	50	40
10	100	80	63
13	160	134	100

pewag winner pro G12 lashing chain system

pewag austro super reinforced + twin TT

Mounting

The chains for heavy-duty utility vehicles.

These tried-and-tested chains were developed further by pewag and now come with an innovative grooved profile.

Areas of use

- Recommended for transporters, utility vehicles with a higher total weight and buses as well as for hauling lumber and for emergency vehicles
- Available for single and twin tires

Product Information

- Longer lifespan and added resistance thanks to stable connection of the running mesh and the side chains using welded rings
- Higher material diameter for excellent grip on soft ground
- Innovative starwave® profile for perfect traction and extended lifespan

Technical Details

- ÖNORM V 5119, TÜV (pewag austro super reinforced)
- Use of TitanGrip® for heavy-duty applications

¹⁾ A - SV: Material strengths 5.6 to 8.2 mm Made in AT;
Material strength 4.5 mm Made in CZ

²⁾ Applies to pewag austro super reinforced

pewag forstgrip

For your safe journey through the forest: pewag forstgrip.

When it comes to forestry applications, reliability and resistance are key factors to ensure safe and efficient working practices.

pewag chains for forestry machines have an extremely high capacity for self-cleaning and are gentle on the subsoil thanks to their relatively low weight.

TITAN Grip®

Mounting

pewag forstgrip comes with an asymmetrical stub arrangement in the running mesh, increasing grip and stability on rough terrain.

pewag forstgrip pro is the reinforced version of pewag forstgrip and therefore the ideal professional chain for heavy-duty applications.

pewag forstgrip cross is the ideal chain for extreme applications and maximum soil protection.

pewag forstgrip

pewag forstgrip cross

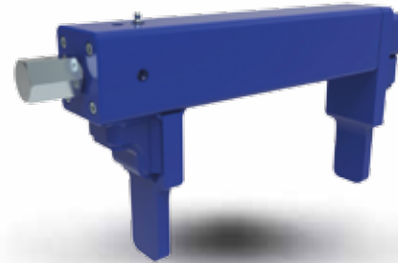

Mounting

Safe grip and the highest possible level of protection for forestry applications.

Professional forestry workers require safety and a strong grip on rough terrain. The newly developed pewag bluetrack forestry tracks offer the same outstanding product characteristics as all pewag products: premium quality, high-level durability and excellent value for money.

To fulfil a wide range of different customer requirements and operating conditions, pewag offers several product versions.

pewag bluetrack mounting tool - one for all

perfekt

duro

pewag bluetrack

pewag bluetrack perfekt is ideal for heavy-duty applications in rocky, steep terrain.

pewag bluetrack duro is a true all-rounder. The track is designed in such a way that it achieves the best possible results for the user with any soil condition.

pewag bluetrack flow is the forestry track of choice for use on easy terrain and with sensitive subsoil.

pewag bluetrack flow wide is particularly gentle on the soil and on the tires thanks to its wide contact surface.

pewag bluetrack flow-perfekt is a combination track that unites the best traction and soil protection features in a single track.
